

**Accident Tips:**

**Call the Police or CHP or 911 for Help**

Often the police will not come if no one reports an injury or needs an ambulance however you should always call.

**Be Calm**

Often people become angry or distraught after an accident however the calm person that gathers the information on this form will have a better chance resolving their claim.

**If You Think You Are Injured, Say So**

Often people politely say that they are 'fine' or 'okay' when asked at the accident if they are injured and then immediately go to a doctor. If you think you may be injured, say so.

If you need ambulance or Emergency Room treatment, go get it. If the accident is not your fault, often the healthcare providers will wait for payment until your claim settles.

**Get Medical Care & Treatment**

Often injury claims are analyzed by the types of injuries diagnosed by healthcare providers and the treatments needed.

Sometimes injuries are first felt in the days following the accident. When that happens, go for diagnosis and treatment without delay.

## ***Glove Box Download***

### *Instructions:*

*Be prepared if you get into an accident by printing out this Glove Box Download and putting one in each of your vehicles.*

*Fold along the line and tuck your registration card and Proof of Insurance form inside. All the information you need in one place.*

*Traffic Accident Law Center – It's what we do™*

If you are in a traffic accident, the pros at the Traffic Accident Law Center want you to be informed and prepared. On the other side of this form, you will find basic information to collect at the scene of the accident to protect you and your family.

Take pictures. The old adage that a picture tells a thousand words is very true. With everyone having a camera built into their cell phone, people often take pictures concerning the location of the accident, how the vehicles came to rest, the license plates and VIN numbers on the other cars, and much more. Protect Yourself - Take Pictures!
